Great photo of your animal(s)

A few tips on taking pictures of your animals. In the world that we live in, an image goes a long way and may make the difference of whether you sell your animal or not. (A rule of thumb is to keep the sun to your back when taking photos and the first two hours of sun and last two hours of sun for the day are the best lighting situations unless it's cloudy, then you can take pictures all day) Thank you.
